CPU COOLING SYSTEM

CPU in Double Protection
With Cooling Fan & Well-designed Heat Sink

With a cooling fan and the special designed heat sink, the CPU board is in double protection to keep at a lower temperature when on working.

In the picture, the heat dissipation plate for CPU board is separate from the main heat sink, which reduced the heat transfer between CPU and amplifier IC, it can protect the CPU at a lower temperature when playing audio and video programs.

CPU 52°C

In fact, a cooling fan is not necessary as the device uses a 12nm lowest power consumption chipset. But we still add a fan here to double-protect the CPU board since this device can run multi-functions at the same time.
